Table of Contents**Management Performance and Financial Conditions****(1) Outline of Operations and Business Results**

Komatsu Ltd. (Company) and its consolidated subsidiaries (together Komatsu) embarked on the Together We Innovate GEMBA Worldwide three-year mid-range management plan in April 2013. Under this plan, Komatsu is making focused efforts on 1) growth strategies based on innovation, 2) growth strategies of existing businesses, and 3) structural reforms designed to reinforce the business foundation.

For the nine-month period (April 1 – December 31, 2013) of the fiscal year ending March 31, 2014, which represents the first year of the mid-range management plan, in the construction, mining and utility equipment business, while demand for mining equipment remained slack, that for construction equipment increased in Japan, China and some other regions. In addition, reflecting the Japanese yen's depreciation, sales increased from the corresponding period a year ago. With respect to the industrial machinery and others business, while sales of machine tools as well as sheet-metal and press machines were firm mainly in the automobile manufacturing industry, total sales declined from the corresponding period a year ago. As a result, consolidated net sales for the nine-month period increased by 2.9% from the corresponding period a year ago, to JPY1,389.5 billion (USD13,233 million at USD1=JPY105). Concerning profits, while the loss of write-off of the inventories of wire saws was realized, operating income improved by 10.1% to JPY165.6 billion (USD1,577 million), supported by improved selling prices and production costs, continued focus on curtailing fixed costs and the Japanese yen's depreciation. Operating income ratio increased by 0.8 points to 11.9%. Income before income taxes and equity in earnings of affiliated companies improved by 16.9% to JPY170.1 billion (USD1,620 million). Net income attributable to Komatsu Ltd. advanced by 26.6% to JPY115.3 billion (USD1,098 million).

Table of Contents

Business results by operation are described below.

Construction, Mining and Utility Equipment

While demand for mining equipment remained slack, especially in coal mines, that for construction equipment was strong in Japan and steadily increased in China, where demand upturned for recovery during the current fiscal year. In addition, the Japanese yen depreciated against the U.S. dollar, euro, renminbi and some other currencies, compared to the corresponding period a year ago. Sales of construction, mining and utility equipment increased by 3.6% from the corresponding period a year ago, to JPY1,250.7 billion (USD11,912 million). Segment profit increased by 10.6% to JPY164.1 billion (USD1,563 million).

Under such an environment, Komatsu steadily launched D61PXi-23 medium-sized Machine Control dozers, which feature the world's first fully automatic blade control, in North America, Europe and Japan. As a next-generation product playing a vital role of the growth strategies based on innovation, Komatsu also broadened its model range. During the period under review, Komatsu worked to reinforce the aftermarket business, which includes the provision of services and sales expansion of strategic parts by using KOMTRAX (Komatsu Machine Tracking System), which is installed in over 300,000 units worldwide. With respect to models certified for new emission regulations which have become effective in the United States, Europe and Japan since 2011, Komatsu continued aggressive market introduction together with KOMATSU CARE, a new service program designed to reduce the total lifecycle costs of these models and prolong machine life.

To strengthen research and development of operations related to manufacturing engineering, Komatsu began operation of a new manufacturing engineering development center, designed to play an important role of reforming production and improving product performance, in the Osaka Plant in October 2013. Komatsu also facilitated activities to cut down electric power consumption to half at all plants in Japan, including the on-going construction of a new factory which will feature dynamic energy-saving and productivity by means of cutting-edge technologies, at the Awazu Plant in Ishikawa Prefecture.

Table of Contents

Komatsu's operations by region are described below.

Japan

During the period under review, demand for construction equipment advanced thanks to an increase in construction investment, growth of demand in the regions destroyed by the Great East Japan Earthquake through full-scale civil engineering works for the construction and relocation of residences to elevated locations as well as redevelopment of communities, and expanded purchase of equipment by customers who have looked into stricter emission regulations for the near future. As a result, sales improved from the corresponding period a year ago.

With respect to products, Komatsu launched D37PXi-23 small-sized Machine Control dozers to Komatsu Rental Ltd. and other rental companies of the Komatsu Group in December 2013, following D61PXi-23 medium-sized Machine Control dozers launched in September 2013. Concerning new products that are compliant with new emission regulations, which have become effective steadily since 2011, Komatsu has launched over 30 models with an addition of the HB205-2 medium-sized hybrid hydraulic excavator and worked to expand their sales.

Americas

In North America, while demand advanced in the housing and energy development sectors, that in the rental sector remained sluggish. While overall demand lacked a growth momentum in the period under review, sales increased from the corresponding period a year ago, reflecting the Japanese yen's depreciation. In June 2013, Komatsu launched D61EXi/PXi-23 medium-sized Machine Control dozers in the United States by leading other regions of the world, and has since increased the volume of their sales steadily.

In Latin America, sales declined from the corresponding period a year ago, against the backdrop of declined demand for mining equipment in copper mines in Chile and Peru.

Europe & CIS

In Europe, demand remained slack in Germany and France, among major markets, as economies remained sluggish against the backdrop of the Eurozone crisis. However, sales increased from the corresponding period a year ago, reflecting the Japanese yen's depreciation.

In CIS, sales decreased from the corresponding period a year ago, as sharply affected by downturned demand for equipment for use in gold mines.

China

Demand, which had been sluggish since FY2011, upturned for recovery in April 2013. Komatsu steadily expanded sales of its flagship 20-ton class hydraulic excavators, especially a new model launched in February 2013, which features improved fuel economy, as well as smaller construction equipment. Sales of 30-ton class hydraulic excavators also recovered in June 2013. As a result, sales significantly improved from the corresponding period a year ago.

In October 2013, Komatsu Shantui Construction Machinery Co., Ltd. a manufacturing subsidiary of medium-sized hydraulic excavators in Shandong Province, received the Deming Prize for 2013 for its proactive TQM (total quality

management) efforts. Komatsu Shantui Construction Machinery Co., Ltd. became the first award-winning overseas subsidiary of the Company.

Table of Contents

Asia & Oceania

In Indonesia, the largest market of Southeast Asia, demand for mining and construction equipment dropped, as especially affected by the sluggish international price of thermal coal and the depreciation of the Indonesian rupiah which has accelerated since August 2013. As a result, sales in Asia plunged from the corresponding period a year ago.

In Oceania, as demand for mining equipment in iron ore mines and that for construction equipment remained slack, sales declined from the corresponding period a year ago. In October 2013, Komatsu introduced 30-ton class HB335/365-1 hybrid hydraulic excavators in Australia by leading other regions of the world. They are Komatsu's second hybrid hydraulic excavators after 20-ton class models.

Middle East & Africa

In the Middle East, sales expanded from the corresponding period a year ago, partly due to demand which increased steadily in Turkey, the largest market of the region, and Gulf nations. In Saudi Arabia, Komatsu worked together with a leading local company, with whom it signed the distributorship agreement in 2012, to steadfastly reinforce sales and product support operations.

In Africa, sales increased from the corresponding period a year ago, reflecting demand for equipment for use in coal and iron ore mines.

Industrial Machinery and Others

While sales of machine tools as well as sheet-metal and press machines remained firm centering on the automobile manufacturing industry, sales decreased by 3.8% from the corresponding nine-month period a year ago, to JPY144.9 billion (USD1,380 million). Segment profit dropped by 70.7% to JPY1.1 billion (USD11 million). In the third quarter of the current fiscal year, the loss of write-off of the inventories of wire saws whose demand have been sluggish was realized in the amount of JPY7.6 billion.

In the business of machine tools as well as sheet-metal and press machines, Komatsu aggressively worked to expand sales of strategic products, such as NTG-4SP grinders, H1F-2 small AC Servo presses, and new KFL Series fiber laser cutting machines, all designed to enhance customers' productivity, safety and environmental performance.

(2) Financial Conditions

As of December 31, 2013, total assets increased by JPY203.4 billion from the previous fiscal year-end, to JPY2,721.3 billion (USD25,918 million), mainly due to the Japanese yen's depreciation against the U.S. dollar, euro and renminbi. Interest-bearing debt increased by JPY24.8 billion from the previous fiscal year-end, to JPY704.6 billion (USD6,711 million). Komatsu Ltd. shareholders' equity increased by JPY161.3 billion from the previous fiscal year-end, to JPY1,354.5 billion (USD12,901 million). As a result, Komatsu Ltd. shareholders' equity ratio increased by 2.4 percentage points from the previous fiscal year-end, to 49.8%. Net debt-to-equity ratio* was 0.44, compared to 0.49 as of the previous fiscal year-end.

* *Net debt-to-equity ratio = (Interest-bearing debt - Cash and cash equivalents - Time deposits) / Komatsu Ltd. shareholders' equity*

For the nine-month period under review, net cash provided by operating activities totaled JPY188.9 billion (USD1,800 million), an increase of JPY59.9 billion from the corresponding period a year ago, mainly due to net income of JPY122.2 billion (USD1,164 million) and improved working capital. Net cash used in investing activities amounted to JPY110.3 billion (USD1,051 million), an increase of JPY8.6 billion from the corresponding period a year ago, mainly due to the purchase of fixed assets. Net cash used in financing activities amounted to JPY62.5 billion (USD596 million), mainly due to the payment of cash dividends, as compared to JPY14.8 billion used for the corresponding period a year ago. After adding the effects of foreign exchange rate fluctuations, cash and cash equivalents, totaled JPY110.8 billion (USD1,056 million), an increase of JPY17.2 billion from the previous fiscal year-end.

Table of Contents

(3) Projection for the Fiscal Year Ending March 31, 2014

(From April 1, 2013 to March 31, 2014)

On October 28, 2013, Komatsu revised its projections of business results for the fiscal year ending March 31, 2014, which are shown on page 2 of this report.

(4) Others

- (1) Changes in important subsidiaries during the nine month period under review: None
- (2) Use of simplified accounting procedures and adoption of specific accounting procedures for the preparation of consolidated quarterly financial statements: None
- (3) Changes in Significant Accounting Rules, Procedures and Presentation and Changes in Significant Accounting Policies and Estimates
 - 1) Changes resulting from revisions in accounting standards, etc.: Applicable

From the fiscal year ending March 31, 2014, Komatsu adopted the Accounting Standards Update (ASU) 2013-02, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income . This adoption did not have any impact on Komatsu s financial position and results of operations.

- 2) Changes in other matters except for 1) above: Applicable

The company and some of its consolidated subsidiaries which had adopted the declining balance method for depreciation of property, plant and equipment changed the depreciation method to the straight-line method beginning April 1, 2013.

Komatsu promotes continuous innovation of technologies by concentrating the production of high-value added and technologically important key components in Japan, and also undertakes integrated development and production under the Mother Plant system. As a general rule, Komatsu engages in local production in different parts of the world where there is sufficient market demand for its products. With respect to mainstay products, however, Komatsu has facilitated effective use of its global production capacities by cross sourcing finished products after producing them at its most cost-effective plants and exporting them in light of changes in market demand and foreign exchange rate. Komatsu is establishing its production efficiency, standardization of production and stable operation of production facilities through renewing its old factory buildings in Japan, reassessing logistics and reforming production process by technology innovation as well as cutting down electric power consumption to half at its plants in Japan. With

respect to capital investment, Komatsu continues to invest in its production facilities for renovation at a constant level. In light of those activities, Komatsu expects stable production and facility utilization within its production capacity, and is able to receive economic benefits from those facilities at a constant rate throughout their durable periods.

Table of Contents

As a result of reviewing its depreciation method, Komatsu concluded that the straight-line method would be an appropriate depreciation method to reflect its usage of property, plants and equipment and to allocate the costs in earnings.

The effect of the change in depreciation method is recognized prospectively as a change in accounting estimate in accordance with the FASB Accounting Standards Codification (ASC) 250 Accounting Changes and Error Corrections .

As a result of the change in depreciation method, depreciation expense for the nine months ended December 31, 2013 decreased by approximately JPY8.6 billion. Net Income attributable to Komatsu Ltd. for the nine months ended December 31, 2013 increased by approximately JPY5.3 billion. Basic and Diluted net income attributable to Komatsu Ltd. per common share for the nine months ended December 31, 2013 increased by JPY5.62, and JPY5.61, respectively.

Cautionary Statement

The announcement set forth herein contains forward-looking statements which reflect management's current views with respect to certain future events, including expected financial position, operating results, and business strategies. These statements can be identified by the use of terms such as will, believes, should, projects and similar terms and expressions that identify future events or expectations. Actual results may differ materially from those projected, and the events and results of such forward-looking assumptions cannot be assured.

Factors that may cause actual results to differ materially from those predicted by such forward-looking statements include, but are not limited to, unanticipated changes in demand for the Company's principal products, owing to changes in the economic conditions in the Company's principal markets; changes in exchange rates or the impact of increased competition; unanticipated cost or delays encountered in achieving the Company's objectives with respect to globalized product sourcing and new Information Technology tools; uncertainties as to the results of the Company's research and development efforts and its ability to access and protect certain intellectual property rights; and, the impact of regulatory changes and accounting principles and practices.

**Komatsu to apply for termination of registration with the U.S. Securities
and Exchange Commission**

Komatsu Ltd. (hereinafter the Company) (President and CEO: Tetsuji Ohashi) hereby announces that at the meeting of the Board of Directors held today, the Company resolved to apply for a termination of its registration with the U.S. Securities and Exchange Commission (the SEC) and its reporting obligations under the Securities Exchange Act of 1934, as amended (the Exchange Act), as below.

1. Reason for termination

The Company issued convertible bonds in the United States through a public offering registered with the SEC in 1967 for the purpose of raising capital, and has since maintained its registration with the SEC.

Since then, the Company has diversified its financing methods, such as through the Euro Medium Term Note Program, and enhanced the efficiency of its funding operation by implementing the Cash Management System. In addition, the external environment has changed considerably, such as an increase in trading of stocks on Japanese stock exchange markets by foreign investors due to the globalization of Japanese financial and capital markets, and the lessening of disparity in the standards of disclosure and internal controls between the United States and Japan due to a series of amendments to Japanese laws, regulations and accounting standards.

The Company has determined that in this environment, there is no need to continue its registration with the SEC. Therefore, the Company has decided to apply for the termination of its registration.

2. Schedule

Early April 2014: The Company will file the Form 15F with the SEC to terminate its reporting obligations under the Exchange Act.

As a result of filing the Form 15F, the Company's reporting obligations under the Exchange Act will be suspended.

Edgar Filing: KOMATSU LTD - Form 6-K

Early July 2014:

Deregistration with the SEC will become effective, terminating the Company's reporting obligations under the Exchange Act.

The schedule may be changed upon the SEC's objection or request for an extended review.

Table of Contents

3. Future plans

While the Company's reporting obligations under the Exchange Act (including the obligation to file annual reports on Form 20-F) will be terminated upon deregistration with the SEC, the Company will continue to prepare English consolidated financial statements in accordance with U.S. GAAP and disclose them on its website together with English translations of disclosures made pursuant to Japanese law and other important information, such as news releases in order to ensure comparability with prior disclosures. The Company will continue to make efforts to maintain and enhance its disclosure to all of its stakeholders, including shareholders and investors.

The Company intends to maintain its American Depositary Receipt program in the United States even after deregistration, and therefore anticipates that its American Depositary Shares will continue to be traded in the United States on the over-the-counter market.
